Pears
Lime 150, 230 CT
Lemons
Broccoli Crowns
Green Grapes
Red Grapes
Iceberg Lettuce 24 CT

MARKET REPORT

APPLES **EXTREME ALERT**

Crop still running about 2 weeks behind. Expect prices for Gala, Golden, and Granny Smith to continue to rise until we start to see some sort of relief. We won't really see volumes fill till September on Gold's and Galas. Volumes for Granny smiths aren't looking to fill till mid-September.

AVOCADOS **EXTREME ALERT**

Prices are rising drastically for all Avocados. Avocados aren't maturing, and Mexico won't allow the harvest of these. 45 million #'s of Avocados were forecasted, and less than 20 million #'s actually got harvested. Expect price to keep rising for the time being.

GRAPES

High temperatures out West still aren't affecting the market as much as expected. Quality is very good, with grapes being sweeter than ever. An active market combined with good quantity leads to lower prices.

CILANTRO

We are starting to have quality issues. Foggy mornings followed by hot afternoon's are burning up the crop. Supplies continue to be limited, and the market is starting to react.

BROCCOLI

Better availability from all growing districts and quality is fair to good. Markets remain unsettled. High heat temperatures out West may effect the market in the coming week.

Upcoming
Events

August is National
Peach Month!

What's Growing? SEASONAL PRODUCE
