

USDA Commodity System

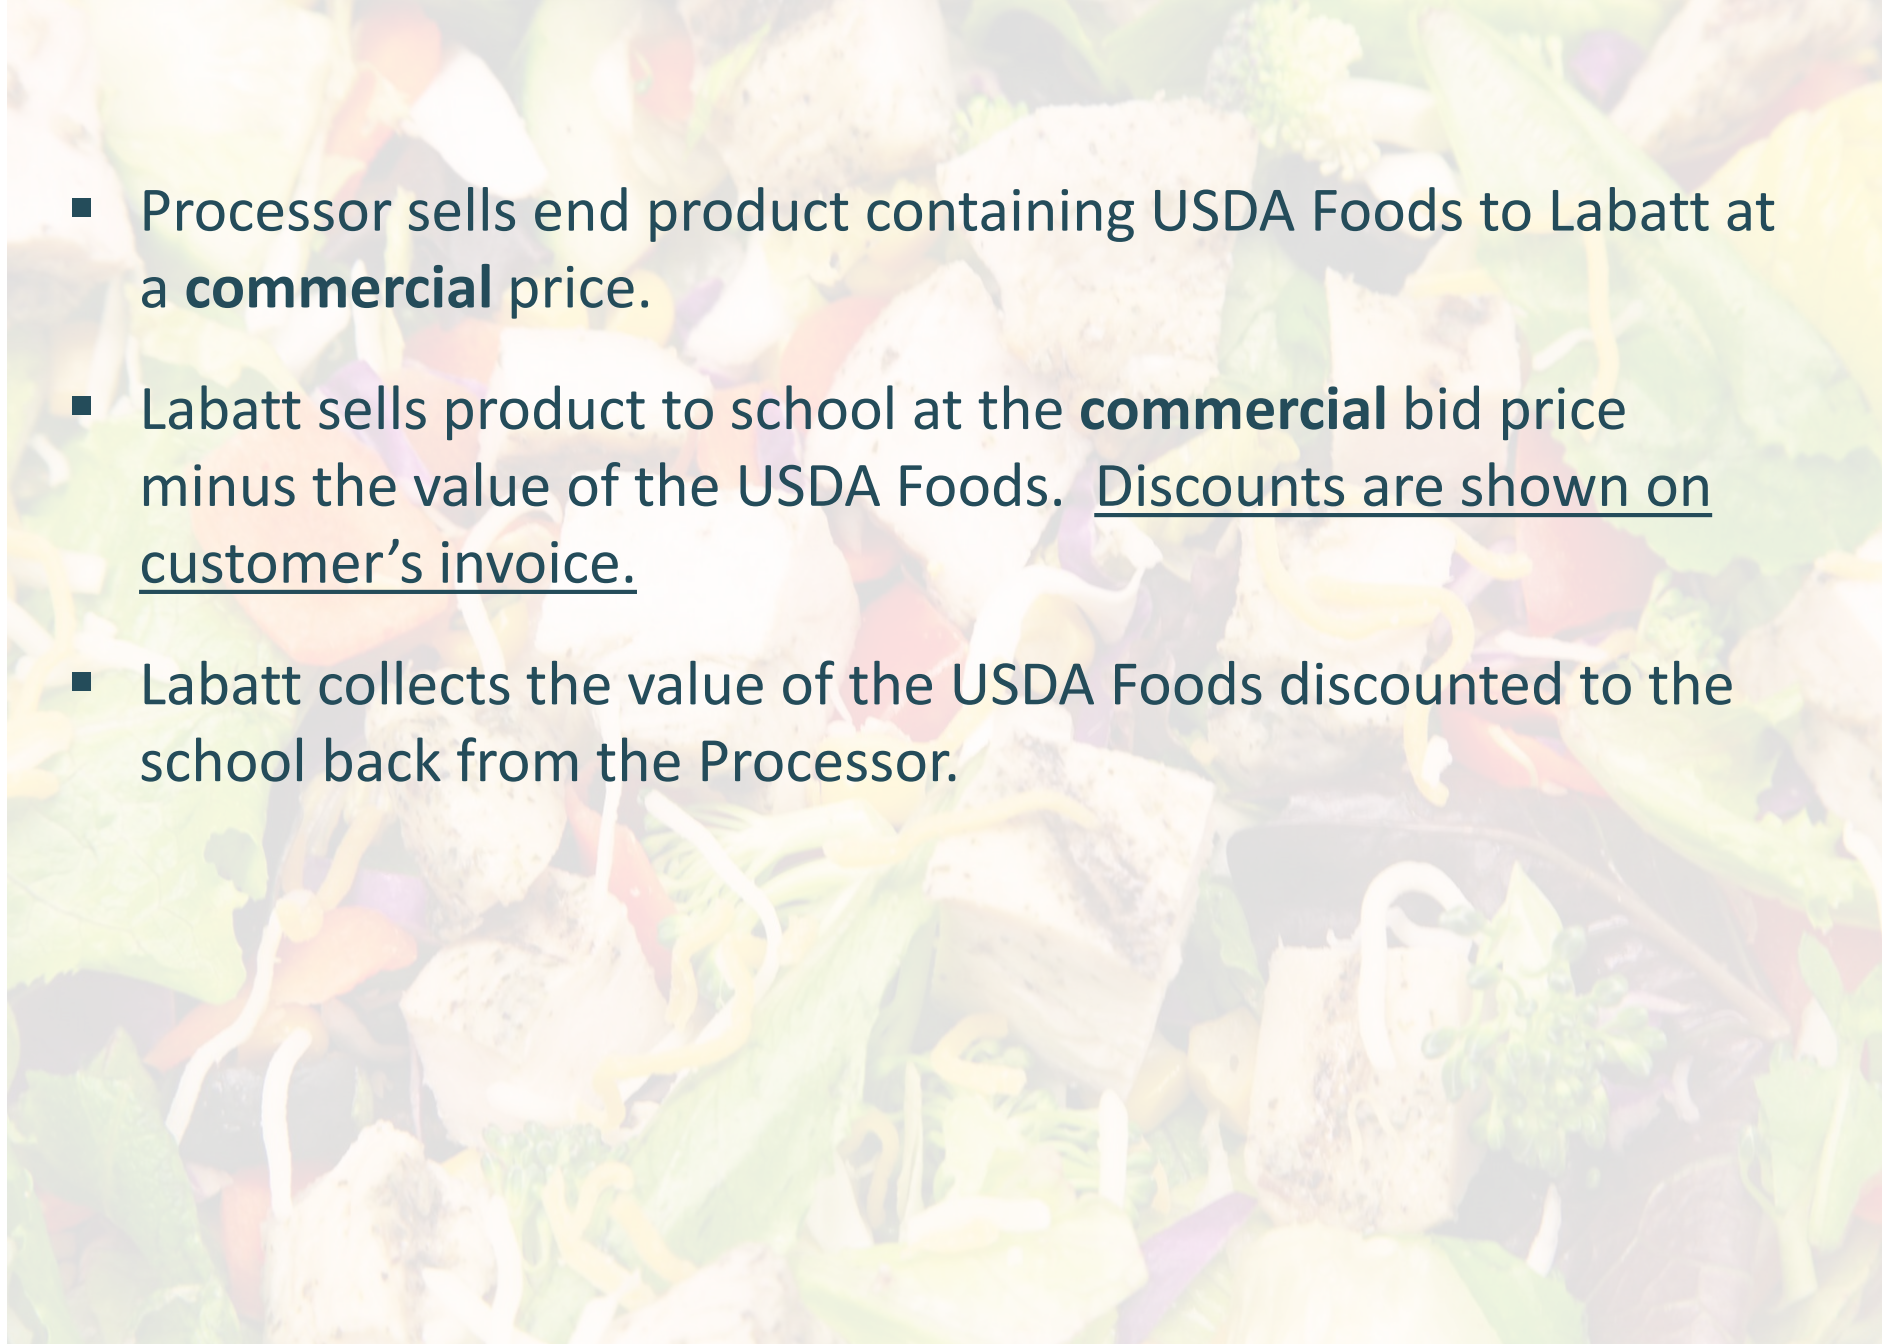

Types of Commodities

- NOI – Net Off Invoice
 - Also referred to as Pass Thru
 - Examples: Cheese, Chicken, Turkey
- MFFS – Modified Fee For Service
 - Examples: Beef, Pork

Net Off Invoice (NOI) Description

- Processor sells end product containing USDA Foods to Labatt at a **commercial** price.
- Labatt sells product to school at the **commercial** bid price minus the value of the USDA Foods. Discounts are shown on customer's invoice.
- Labatt collects the value of the USDA Foods discounted to the school back from the Processor.

Commodity Discount On Invoice

K12 & ProcessorLink Notes

- Every evening Labatt sends a file to both K12 and ProcessorLink with all commodity transactions invoiced that day.
- Every morning K12 and ProcessorLink sends a report to Labatt with commodity bank adjustments (transfers, direct shipped orders, new banks).
- Wait time – Changes made in ProcessorLink are normally sent to Labatt in 1-2 days. Changes made in K12 can take up to 2 weeks.
- Districts have access to view their commodity banks in both K12 and ProcessorLink. Banks may differ until daily updates are uploaded in Labatt's system.

Commodity Notes

Commodity Notes

- ❖ **Districts must go into K12 and ProcessorLink and choose Labatt as their Sales Channel for each vendor in order for Labatt to receive their pounds.**
- Pounds are not automatically carried over from the previous school year and available on July 1st. All manufacturers have to re-evaluate unused pounds and send back to Labatt thru ProcessorLink and K12. It is important to look at pounds available at the start of a new school year before ordering.
- Carryover pounds are always drawn down first in Labatt's internal system and in K12 and ProcessorLink.
- Credits – Pounds are automatically added back to the district's bank when a credit is entered into the system.
